

Mindset and Memory

*a series of remote workshops for the parents and carers
at Julian's Primary School, created by TailoredPractice*

The following sessions were created for the parents and carers in order to share with you some of the research and techniques that we have been using at Julian's. Although each video has been created for a different phase, they are applicable for all primary school ages.

We hope you find the sessions useful. If you wish to give us some feedback on the sessions, we would appreciate it. Please go to [this feedback link](#) to do so. Thank you.

Mind Your Language video

How the language we use with children can have a lasting impact on their attitude to learning
EYFS focus (approx 14 mins)

Make Thinking Visible video

How our language can help children develop their thinking and learning skills
Key Stage One focus (approx 13 mins)

Mindset and Memory video

What parents and carers should know about memory and how they can support their children's learning at home
Key Stage Two focus (17 mins)
